### STORAGE INFORMATION *(Required)*

This is the capacity of a charged battery. It affects how many batteries can be contained in the event of thermal runaway. The information will be found on the battery and should be supplied in Watt hours (Wh) only. Please do not supply kWh figures.

The capacity of an individual battery is: Wh

### CHARGING ADVICE

The number of batteries that can be safely charged in a Phoenix battery safe cannot be precisely determined due to varying charger power consumption.

Consultation with a qualified electrician is recommended before charging to ensure safety and compliance.
