VERTICAL BIKE LOCKER STORAGE SPECIFICATION SHEET

Dimensions Height: 1990mm X 800 MM wide x 1100mm deep

Construction: Door frame constructed from heavy gauge 1.5mm Electro Zinc rust resistant steel providing a corrosion protection and powder coated paint finish.

Door Strength: Full length door stiffeners for extra door rigidity and Five Heavy duty semi-concealed hinges.

Style: Attractive and functional locker design.

Colour: Automated paint plant ensures consistent high quality finish in a wide range of modern door and body Powder coated colours Dark Grey, Dark Green, Black

Detailed Product Specification Lockers are fully assembled and supplied in single units. All lockers are holed in back and sides to enable them to be bolted together into rows or back to back to suit your requirements.

Construction: Spot welded and pop riveted.

Material: 1.5mm thick Electro Zinc and Powder Coated.

Door Frame Assembly: Comprising two uprights manufactured from 1.5mm thick Electro Zinc and powder coated. Press formed channel section; top and bottom cross members which are designed to create door stops.

Spot welded construction produces a rigid frame enabling door clearances to be maintained in accordance with British Standard requirements.

Doors are attached to the right hand side of door frame upright with five heavy Duty semi concealed hinges.

The inside of the door has a full length vertical 'stiffeners' to provide greater rigidity. Two rubber buffers are fitted to the top and bottom corners of the door for quiet closure.

Cycle

Floor internal guide ramp. Easily guide the bike into the locker.

Heavy Duty front wheel retaining hook (Bike drops easy into place and holds the bike in the vertical position)

Hooks 4 coat hooks are provided inside each locker for holding helmets, coats and accessories.

Locking: 3 Point locking to the top and bottom of the door and centre

Standard options are either 10 disc tumbler cam lock in mastered suite with two keys to each lock or, at no extra cost, a latch lock for the user's own padlock (recommended padlock shank dimensions 6 mm). Recommended padlocks are available from Premier Lockers Other locks available are Electronic locks that allow multiply users to use the locker.
